

Electrical and Electronic Equipment Policy

The Waste Electrical and Electronic Equipment (WEEE) Directive is UK law. Sonic Communication (Int) Ltd is committed to protecting the environment and recognises its responsibility as a producer of Electronic and Electrical Equipment (EEE) and welcomes the opportunity to provide safe ways to dispose of WEEE. To limit the costs and risks which are passed onto our customers we have decided not to charge a WEEE levy at the time of purchase of our products. With this in mind we have adopted a takeback and recycle program as part of our corporate responsibility.

Sonic Communications (Int) Ltd. is classed as a B2B producer with respect to EEE under the waste electrical and electronic equipment regulations 2006.

Regulation 9 places an obligation on Sonic Communications (Int) Ltd. to finance the cost of treatment, recovery and environmentally sound disposal of WEEE from our customers where that WEEE:

- a) Is composed of equipment sold to our customers before 13th August 2005 and that is being replaced by products from Sonic Communications (Int) Ltd. of the same type or that performs the same function.
- b) Is composed of Sonic Communications (Int) Ltd. equipment purchased by our customers after 13th August 2005.

Where Sonic Communications (Int) Ltd is responsible for WEEE under scenarios (a) or (b) above, it is the responsibility of the customer to deliver the WEEE in question to Sonic Communications (Int) Ltd premises in Birmingham, after which point we will accept any further treatment or recycling costs.

We will not be responsible for WEEE originally produced by ourselves where our branding has been replaced or removed or where the WEEE has been converted or modified without our permission.

Sonic Communications (Int) Ltd meet our responsibilities as a small producer of EEE through registration with ERP UK Ltd. Our registration number is WEE/AK0054TQ.
