SRH/SRC AUDIO ACCESSORY ADAPTOR KIT

ITEM 21

The Sonic Covert Audio Accessory Adaptor is designed to allow the standard Sepura SRC/SRH covert system to be modified into a non-inductive receive accessory, using standard domestic MP3 style dual earpiece earbuds or headsets fitted with a 3.5mm jack plug.

This provides a cost effective receive option when operating in high electro-magnetic noise environments and the issues associated with covert wireless earpieces, or in the event that using a wireless earpiece is not practical for other reasons.

The microphone of the existing covert brooch or neckloop microphone inductor can continue to be used, or as an alternative a miniature microphone can be supplied.
